VMV-402-SH Latest Updates

Important Note – Please read before updating

If your VMV-402-SH model has a current Firmware version less than Version 4.7, please select the update file:

VMV-402-SH App V4.11 Firmware V4.7 and install it BEFORE installing the latest version or results may be unpredictable.

If Firmware version V4.7 is already installed, you may proceed with the file:

VMV-402-SH App V4.18 Firmware V4.13

The Firmware version appears on the video output of the VMV-402 a few moments after power is applied. See example below.

This information is also available through the VMV-402 Control App at Settings/ Utilities / Information.
