Marshall Electronics Unveils Super High Resolution 37mm CCD Miniature Color Camera

Marshall Electronics to release new feature-packed miniature color camera addition to Optical Systems Division.

El Segundo, CA – The Optical Systems division at Marshall Electronics has released a new addition to its line of HD and composite Miniature Cameras. The new state-of-the-art V-1275-BNC Super High Resolution Miniature Color Camera makes use of Sony EFFIO-V CCD technology and is a great solution for any surveillance or machine vision where lighting is less than ideal.

Measuring only 37mm x 37mm, The V-1275-BNC offers Composite Video at an incredible 700 TV lines and hosts a robust array of hardware features including superior defog, digital noise reduction, anti-blur, smart motion detection and adaptive tone and color reproduction.

The on-board 0.1 lux light sensitivity sensor, Day & Night Function, and Advanced WDR allow for a wide range of useability in virtually all lighting conditions. Controllable via multi-language OSD, user can select through High-Light Mask, Lens Shading, Compensation and Smart Motion multi-functions.

The V-1275-BNC comes with a 3.6mm lens and can be optionally interchanged with most 4300, 4400 Hi-Res, 4700 2MP IR Corrected Miniature Lens Series, or Marshall Miniature M12 mount pinhole lens models.

The V-1275-BNC Super High Resolution CCD Miniature Color Camera is available now for \$169.00 from Marshall Electronics. Learn more at http://www.marshall-usa.com/optical/cameras/case_color/V-1275-BNC.php
