CV-H20-HF

Compact Weatherproof Camera Housing with Fan & Heater

User Manual

Optional Weather Proof Power Supply CV-H20-PWR

The CV-H20-PWR is STRONGLY recommended for use with this product.

CAUTION

WARNING

To reduce the risks of an electric shock, do not expose inside of this unit to rain or moisture.

Installation on a rainy day may also cause fog around the capsule.

Installation

Installation shall be done by qualified installer only and should conform to all local codes.

Ensuring Strength of Supporting Dome Housing Unit

The unit must be properly and securely mounted to a supporting structure capable of sustaining the weight of the unit. Recommended use of 3/8" stainless screws x three (3).

Prohibit Changes or Modifications of Equipment

You are cautioned that any changes or modifications not expressly approved in these instructions could void your authority to operate this equipment.

Basic Operating Environment Condition

We provide warranty for the products that are installed under normal outdoor -20°C \sim +50°C conditions. We are unable to provide warranty for the products which are installed indoor and exposed to constant high temperature over +50°C and over 90% humidity.

Operating temperature and humidity of camera varies from camera to camera. You are requested to confirm to camera specification with camera manufacturer and housing specification with us in advance.

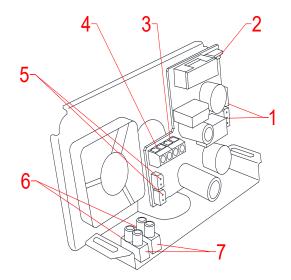

i.e. -20°C or below, you are requested to use additional heater and +50°C or above you are requested to use two blowers and sunshield.

Fasten wires tightly.

Attention: Keep wires away from the Fan / Heater, and do not disturb Fan/Heater's performance

3. Dimensions

4. Safeguards

- 1. Read Instructions All the safety and operating instructions should be read before operating the unit.
- 2. Retain Instructions The safety and operating instructions should be retained for future reference.
- 3. All warnings on the unit and in the operating instructions should be adhered to.
- 4. Follow Instructions
- 5. Electrical Connections Only a qualified electrician should make the electrical connections.
- 6. Attachments Do not use attachments not recommended by the product manufacturer as they may cause hazards.
- 7. Cable Runs All cable runs must be within permissible distance.
- 8. Mounting This unit must be properly and securely mounted to a supporting structure capable of sustaining the weight of the unit. Accordingly:
 - a. The installation should be made by qualified installer.
 - b. The installation should be in compliance with local codes.
 - c. Care should be exercised to select suitable hardware to install the unit, taking into account both the composition of the mounting surface and the weight of the unit. Be sure to periodically examine the unit and the supporting structure to make sure that the integrity of the installation is intact. Failure to comply with the foregoing could result in the unit separating from the support structure and falling, with resultant damages or injury to anyone or anything struck by the falling unit.
